

Click “Start” located at left lower corner

Move Cursor over Settings and then click “Control Panel” as shown below

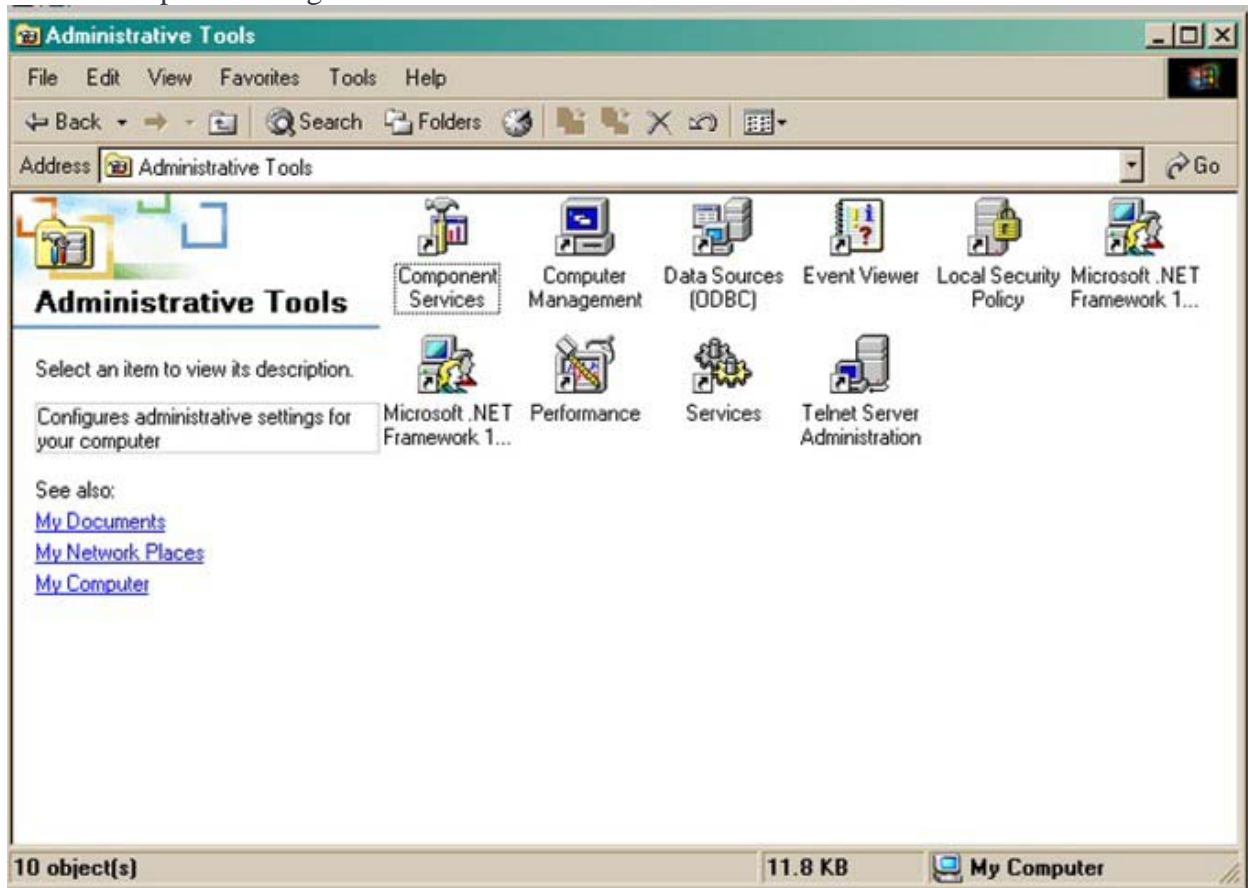

(see next page)

Click “Administrative Tools” as shown below

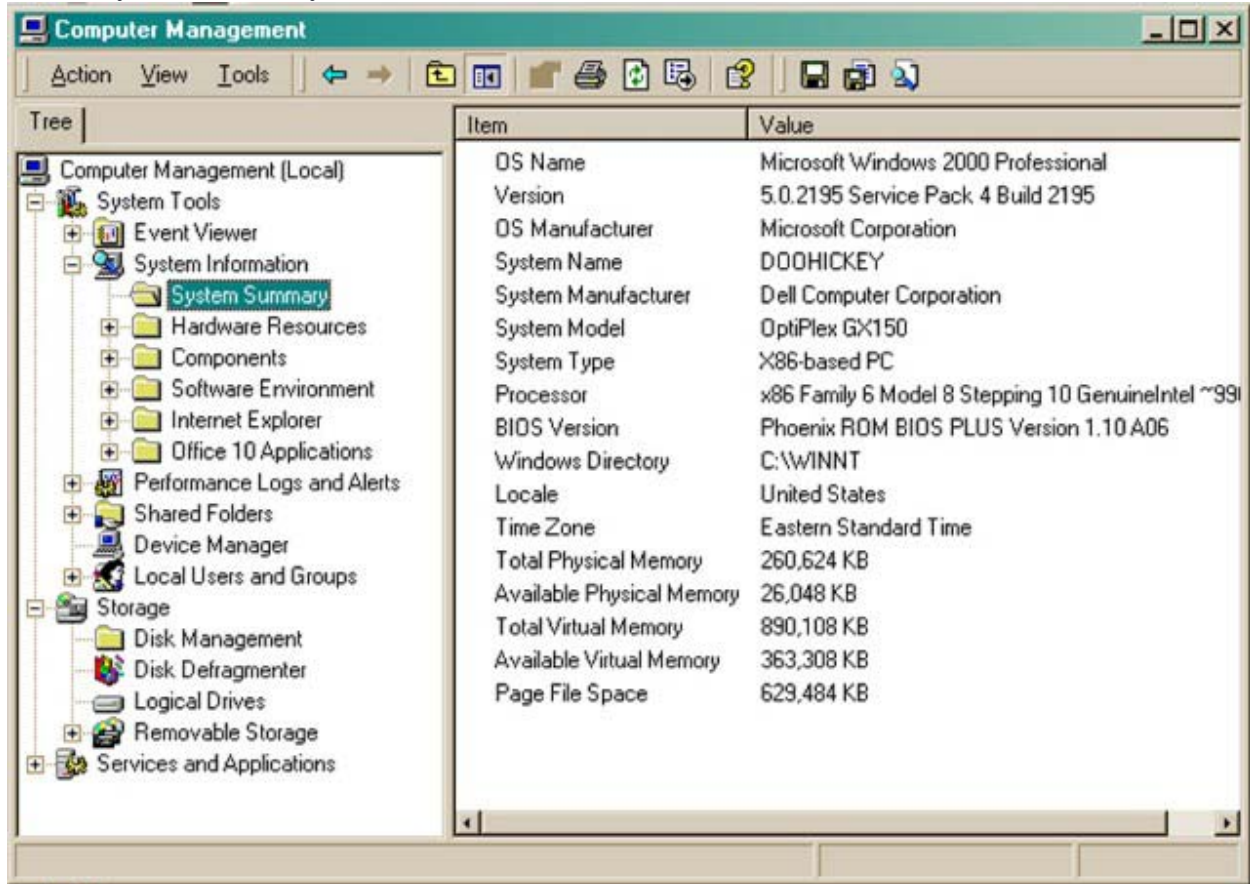

(see next page)

Click “Computer Management” as shown below

(see next page)

Click “+” box on the left of “System Information” to reveal the additional selections
Click “System Summary” as shown below

The information you look for are:

- OS Name ⇒ this is your operating system
- Processor ⇒ number at the end is your processor speed
- Total Physical Memory ⇒ this is the installed memory
