Embed Google Sites in Elearning

In order to embed a Google Site into Elearning, you will first need to allow your site to be embedded. Visit https://support.google.com/sites/answer/6024145 for instructions on allowing your site to be embedded.

1. Copy the URL of your site. Ex: https://sites.google.com/a/wmich.edu/test-site/

2. Navigate to the Elearning module you would like to embed your Google Calendar into and click the New button. Select the Create a File option.

3. Give your item a title and then select the HTML editor in the lower right hand corner of the content box.
Embed Google Sites in Elearning

4. Create an iframe in the HTML Source Editor. The height and width are not required, but a height of 600 and a width of 800 are recommended.

```html
<iframe src="https://sites.google.com/a/wmich.edu/test-site/" height=600 width=800></iframe>
```

7. Click the **Publish** button to save your content.
