Western Michigan University's College of Education & Human Development, United Way of the Battle Creek & Kalamazoo Region, Raising Kalamazoo County, and the Michigan ACE Initiative invite you to view the award-winning documentary Resilience.

RESILIENCE: THE BIOLOGY OF STRESS & THE SCIENCE OF HOPE chronicles the birth of a new movement among educators, pediatricians, therapists, policy makers, and communities who are using cutting-edge brain science to disrupt cycles of violence, addiction and disease.

Don’t miss this unique opportunity to see Resilience – a documentary that clearly and succinctly describes Adverse Childhood Experiences (ACEs) and their impact. ACEs are associated with student success, alcoholism, drug use, suicide, domestic violence, and more. Resilience chronicles how innovative research is being used to both prevent ACEs and mitigate their effects. The screening will be followed by a dynamic conversation about how we can support a trauma-informed community for Kalamazoo’s children and families.
