

# 2022 BURIAN LECTURE

## Uncertain Expertise in Trans Medicine

How do medical providers, who are expected to be knowledgeable about delivering care, manage uncertainty and challenges to their expertise?

In ***Trans Medicine: The Emergence and Practice of Treating Gender***, shuster traces the development of transgender medicine from the 1950s to modern medicine to show how providers create and use scientific and medical evidence to quell uncertainty, “treat” a gender identity, and uphold their authority and status as experts.

**Thursday, Nov. 17**  
**6 to 7:30 p.m.**  
**CHHS Room 4010**

Livestream available.  
ASL translation available.
