# **ABOUT THE PROGRAM**

The M.A. in Sport Management is a 30-credit program. This program is designed to prepare students to blend general management skills with the specific demands of managing a variety of levels of sport organizations. Students can take 100% online courses or online courses with some in-person courses to finish the degree in 12 months, 16 months, or 20 months depending on individual plans. Sport management majors acquire a strong foundation in management, marketing and sales, sport finance, sport media, legal issues, and ethics in sport.

My experience with Bronco Productions has allowed me to produce all home football games and apply the knowledge learned in class.

Thomas Delves, alumnus

All courses are designed to meet or exceed national standards set forth by the **North American Society for Sport Management** accrediting body.

In addition to the 27 credits of sport management courses, students have the option of completing either a 3-credit thesis, independent research or field experience. Students learn through handson experience while utilizing top of the line equipment in state-of-the-art lab spaces.
