In May 2015, WMU Libraries introduced Library Search, a simplified and centralized way to conduct research. Library Search combines the library catalog with hundreds of databases to provide expanded search results including books, articles, and audio visual materials. All items retrieved by the search should be available to WMU students and employees in either full-text or physical hard copy formats.

Search results may be easily refined using limiters that appear on the left side of the results pages. Examples of useful limiters include material type (e.g. book, e-book, dissertations, etc.), peer-reviewed journals, date, and many others. Search results may also be expanded to display material not included in the WMU Library collections, but accessible using the interlibrary loan service.

Library Search is located near the top of the Libraries’ homepage. Individual databases may still be searched by using the “Databases and Guides by Subject” button located on the homepage.

For additional information, please visit: http://libguides.wmich.edu/librarysearch

Get research-ready.
Attend a drop-in session to learn more about Library Search.

Waldo Library, Classroom A
Wednesday, September 9, 3-5 p.m.

Education Library, Room 2809
Tuesday, September 15, 1-3 p.m.
Wednesday, September 23, 2-4 p.m.

Contact: Michele Behr, (269) 387-5611

Students, faculty, and staff are encouraged to attend to learn how to use this valuable tool. Drop-in sessions will include research demonstrations, Q&A with librarians, and light refreshments.

Bring your personal computer or mobile device to get real-time, hands-on assistance from the experts or stop by and view a demonstration.
