Implicit Bias Awareness at WMU

This workshop for staff will focus on implicit and unconscious bias awareness, how implicit bias is encountered at WMU, specifically, and empowering the individual to recognize and counter their own bias as well as bias in others.

Structures for reporting incidents of bias (and when bias becomes harassment) will also be covered in the workshop. Participants will leave the training workshop more aware of their own biases as well as ready to counter biased behavior.

Participants will evaluate the workshop, providing data on valuable aspects and topics for future training events.
