

Econ 1000

Econ for Elementary Education

This course is a survey of select microeconomic and macroeconomic topics, which is intended to prepare Elementary Education students for the state certification test.

The microeconomic topics include comparative advantage and trade, supply and demand, market equilibrium and economic efficiency, and the evaluation of certain government policies such as price floors and ceilings, and taxes and subsidies. The macroeconomic topics include the measurement and meaning of gross domestic product, inflation, and unemployment, and a brief overview of fiscal and monetary policies.

- **This course is open ONLY to education majors**
- **This course is taught in a hybrid format**
- **There are four examinations and an abundance of online homework assignments and quizzes**
- **This course CANNOT be used to satisfy major or minor requirements in Economics**
