

# Research Assistants Wanted

If you want to go to graduate school in the field of psychology, then you need research experience!

We are studying an intervention designed to promote adherence to HIV medicine and we need your help.

**You will get real experience managing a behavioral intervention, conducting participant interviews and managing research data.**

We have other studies planned involving problem drug use, exercise, and decision making. Some students may even be able to conduct an honors thesis with us.

Contact Amanda to see if joining our team is right for you!
