

WESTERN MICHIGAN UNIVERSITY

Bay de Noc Community College

Fall 2019

WMU Curriculum Guide for Freshwater Science and Sustainability

Program description and notes:

- WMU and Northwestern Michigan College in Traverse City have collaborated to create this new program, which became a WMU offering effective Fall 2014;
- Provides the broad interdisciplinary training that will enable graduates to help solve problems involving the quality, availability, and use of freshwater;
- The program prepares students for positions in the field such as: watershed managers, freshwater quality analysts, sustainability coordinators, environmental and resource managers, and/or for graduate school;
- The program requires 92 credit hours of coursework. All WMU degrees require at least 122 credit hours for graduation;
- There are two options for students to complete this program:
 - The first is to take as many courses as you can at Bay and then to transfer to WMU (in Kalamazoo) for the last two years of the program in regular classroom format;
 - The second option is to take a combination of online and hybrid courses. The hybrid courses include some online coursework and face-to-face meetings which are only available in Traverse City at this time;
- No minor is required;
- There will be a significant fieldwork component to several courses in the program;
- Given the interdisciplinary nature of the program, it is very important that students work regularly with program advisors (see contact information below). Please consult with a program advisor and review the schedule of courses closely when selecting your classes.

Courses that may be taken at Bay:

WMU courses

ANTH 1200
ECON 2010 or 2020 (2010 preferred)
MATH 1110
STAT 3660
BIOS 1620
BIOS 1610

Bay equivalent courses

ANTH 201 or 201H
ECON 132 or 131
MATH 105
MATH 210
BIOL 110
BIOL 112

Students in this program must earn a grade of “C” or better in all courses counted toward their major. Courses that transfer to WMU must also have a minimum of a “C” grade in order to transfer in.

For further information about this program visit the Environmental and Sustainability Studies program website, linked in the WMU website’s “Academics” (undergraduate) directory pages.

General Education Requirements:

- Please find information about [general education requirements](#) on this link;
- All students graduating from the College of Arts & Sciences must meet the world language proficiency by completing two semesters (6-8 hours) of the same foreign language or American Sign Language, or passing WMU’s proficiency by exam. Please contact the College of Arts & Sciences Undergraduate Advising Office at (269) 387-4366 with any questions. Neither the MACROA Agreement nor the MTA satisfy the world language requirement.
 - If the student’s first language is not English, then the student is exempt from this requirement. Determination of eligibility for this exemption is based on whether the student was required to take the TOEFL test for admission, and can be verified through the WMU departments of Spanish or World Languages and Literatures.
- The College of Arts & Sciences requires a critical thinking course, to be chosen from Proficiency 4c. See the general education transfer guide cited above. MACRAO or MTA will cover this requirement.
