The Institute of the Environment and Sustainability, the Department of Political Science and the Climate Change Working Group presents

"The Politics of Carbon Pricing"

Barry Rabe, PhD, will examine the feasibility of policy innovation in climate and energy politics at all levels of government. His newest book Can We Price Carbon? (MIT Press) was released in spring 2018. This talk will draw from Rabe’s extensive work on the politics of carbon pricing and the lessons from efforts to adopt and implement carbon tax and cap-and-trade policies over the past two decades.

Dec. 6, 2018
6 p.m.
University Center for Humanities
2500 Knauss
OPEN TO ALL
Refreshments provided

Dr. Rabe is the Harris Family Professor in the Gerald Ford School of Public Policy at the University of Michigan. He is also the Arthur Thurnau Professor of Environmental Policy and holds courtesy appointments in the Program in the Environment, the Department of Political Science, and the School for Environment and Sustainability.
