

Accelerated Graduate Degree Programs

Combined bachelor and master's programs

wmich.edu/grad/academics/accelerated-programs

Western Michigan University's Accelerated Graduate Degree Programs allow undergraduate students meeting certain criteria to enroll in up to 12 graduate credit hours during their senior year.

For many master's programs, these 12 credits represent up to 40% of the total graduate degree requirements, saving students significant time toward completing their graduate degree.

These programs also provide an opportunity to save money, since the tuition for these graduate credits are assessed at the undergraduate tuition rate.

According to the U.S. Bureau of Labor Statistics, data show that workers who have higher levels of education typically earn more and have lower rates of unemployment compared with workers who have less education. WMU's Accelerated Graduate Degree Programs are a great way to position yourself for career choices.
