D. Explain briefly and clearly the proposed improvement.

We propose to add "Special Education and Elementary Education: Learning Disabilities and Emotional Impairments K-12" (SELJ) and "Early Childhood Professional Education" (ECEJ) to the list of students allowed to take this course.

E. Rationale. Give your reason(s) for the proposed improvement. (If your proposal includes prerequisites, justify those, too.).

The Special Education and Early Childhood majors were revised several years ago. The new codes (SELJ and ECEJ) need to be added to this course (ED 3710) so that students can register themselves. Right now, the Advising Office has to do manual overrides, which can delay registration and prevent students from gaining a spot in the course before it is filled.

F. List the student learning outcomes for the proposed course or the revised or proposed major, minor, or concentration. These are the outcomes that the department will use for future assessments of the course or program. The proposed change will not affect the learning outcomes.

G. Describe how this curriculum change is a response to student learning assessment outcomes that are part of a departmental or college assessment plan or informal assessment activities.

This change was requested by the CEHD Advising Office, which noticed that Special Education students and Early Childhood Education students were not allowed to register for this required course (ED 3710). The course restriction list needs to be updated to reflect the revised Special Education (SELJ) and Early Childhood Education (ECEJ) majors that now require ED 3710.

H. Effect on other colleges, departments or programs. If consultation with others is required, attach evidence of consultation and support. If objections have been raised, document the resolution. Demonstrate that the program you propose is not a duplication of an existing one.

No effect.

I. Effect on your department's programs. Show how the proposed change fits with other departmental offerings.

No effect.

J. Effects on enrolled students: are program conflicts avoided? Will your proposal make it easier or harder for students to meet graduation requirements? Can students complete the program in a reasonable time? Show that you have considered scheduling needs and demands on students' time. If a required course will be offered during summer only, provide a rationale.

No effect on enrolled students, except that it will be easier for them to enroll in this required course.

K. Student or external market demand. What is your anticipated student audience? What evidence of student or market demand or need exists? What is the estimated enrollment? What other factors make your proposal beneficial to students?

The proposed change will not affect external market demand, student audience, or enrollment. It will be beneficial to students because it will eliminate an area of frustration to them (i.e., their current inability to register themselves for this required course).

L. Effects on resources. Explain how your proposal would affect department and University resources, including faculty, equipment, space, technology, and library holdings. Tell how you will staff additions to the program. If more advising will be needed, how will you provide for it? How often will course(s) be offered? What will be the initial one-time costs and the ongoing base-funding costs for the proposed program? (Attach additional pages, as necessary.) No effect.

M. General education criteria. For a general education course, indicate how this course will meet the criteria for the area or proficiency. (See the General Education Policy for descriptions of each area and proficiency and the criteria. Attach additional pages as necessary. Attach a syllabus if (a) proposing a new course, (b) requesting certification for baccalaureate-level writing, or (c) requesting reapproval of an existing course.) Not applicable.

N. (Undergraduate proposals only) Describe, in detail, how this curriculum change affects transfer articulation for Michigan community colleges. For course changes, include detail on necessary changes to transfer articulation from Michigan community college courses. For new majors or minors, describe transfer guidelines to be developed with Michigan community colleges. For revisions to majors or minors, describe necessary revisions to Michigan community

college guidelines. Department chairs should seek assistance from college advising directors or from the admissions office in completing this section.

Not applicable

O. Current course description:

Students will examine and apply recent research on effective classroom management, concentrating on such variables as time on task; appropriate choice of group structures and direct instruction; the management of time, space, and materials; and the analysis of classroom interactions. Students will design, implement, and evaluate an integrated curriculum and will learn management principles designed to minimize 'discipline problems. Micro-teaching experiences and a supervised teaching practicum will give each student the opportunity to apply research on effective teaching and to become an effective classroom manager. Requires a minimum of two (2) full days per week participation in a classroom. Includes a weekly two-hour seminar at the school to which the student is assigned. Seminar focuses on building relationships with students, responding effectively to students from diverse cultural backgrounds, accommodating students with special needs, effective record keeping, and problem-solving in daily teaching situations. Program requires a grade of 'CB' or better. May repeat course one time only.

P. Proposed course description:

No Change.
