

Aviation Management and Operations

Western Michigan University's aviation management and operations program (BS) is designed to prepare tomorrow's aviation business leaders, today. As an aviation management and operations student at WMU, you will unite two areas of interest: **aviation** and **business**. Students will take aviation classes in conjunction with business classes.

Minors

There are several minors students can add to enhance their degree, including:

- Aviation Supply Chain Management
- Business Analytics
- General Business
- Economics
- Leadership and Business Strategy

Valuable Coursework

Students in the aviation management and operations program have the opportunity to take a variety of aviation-specific management courses. Some include:

- Airport Planning
- Aviation Supply Chain Management
- Aviation Safety and Security

Internship Opportunities

Students are encouraged to pursue an internship opportunity while at WMU. Opportunities are available at airports, airlines, and corporate flight departments across the country.

Possible Careers

The aviation management and operations program prepares students for a wide range of careers, including **Airline and Airport Management, Corporate Aviation Management, Aviation Marketing, Aviation Dispatch, Aviation Consulting, Aviation Safety, and Airport Planning.**
