

GoReact Documentation is updated regularly. Please check back frequently for updated versions of this document at goreact.com/support

Logging into GoReact

Watch a short video or review more in-depth information below.

- 1 If your course is managed on goreact.com, log in to GoReact by clicking the Login button at the top right corner of the [GoReact homepage](#). **NOTE:** If your course is held in an LMS (Canvas, Blackboard, etc.), you will need to log in there.

- 2 Enter your email address and password, then click Login.

A screenshot of the GoReact login form. The word 'LOGIN' is centered at the top in a large, light gray font. Below it, there are two input fields. The first is labeled 'Email Address' and contains the placeholder text 'email@email.com'. The second is labeled 'Password' and contains the placeholder text 'Password'. Below the password field is a red button with the text 'LOGIN'. At the bottom of the form, there is a link that says 'Forgot password' in red, italicized text.

If you are having difficulty logging in, you can reset your password by using the "Forgot Password" link at the bottom of the login page. The password reset email can sometimes be filtered into your Spam folder, so be sure to check there as well as your Inbox!

Important Note

If your course is managed through an LMS (Blackboard, Canvas, etc.) then you cannot log into goreact.com. Please log into your LMS directly to access your course and assignments - this is the only place they will be available.
