

A Summary of Faculty Results

Student engagement represents two critical features of collegiate quality. The first is the amount of time and effort students put into their studies and other educationally purposeful activities. The second is how institutional resources, courses, and other learning opportunities facilitate student participation in activities that matter to student learning. FSSE surveys faculty who teach at least one undergraduate course in the current academic year. This *Snapshot* is a concise collection of key findings from your institution's FSSE 2013 administration. We hope this information stimulates discussions about the undergraduate experience. Additional details about these and other results appear in the *Frequencies* and *FSSE-NSSE Combined* reports.

High-Impact Practices

Due to their positive associations with student learning and retention, special undergraduate opportunities are designated "high-impact." The first figure at right compares the percentage of your faculty who believed it was "Very important" or "Important" for undergraduates at your institution to participate in High-Impact Practices before they graduate. The second figure summarizes faculty participation in three selected High-Impact Practices in a typical week.

Faculty Values for High-Impact Practice Participation

Note: Percentage of faculty responding "Very important" or "Important"

Faculty Participation in High-Impact Practices

a. Percentage of faculty responding "Yes" to participation

b. Percentage of faculty responding that at least "Some" of their courses include a service-learning component

Time Spent Preparing for Class

These figures report the average weekly class preparation time your faculty *expected* students to spend, and the average amount of time they perceived students *actually* spent, in the faculty's selected course sections.

Reading and Writing

These figures summarize the number of hours your faculty expected students to spend reading, and the average number of pages of assigned writing, for the faculty's selected course sections.

Note: The number of pages of assigned writing is an estimate calculated from three separate survey questions.

Time Allocation

This figure summarizes the number of hours that faculty spend in a typical seven-day week on teaching activities (preparing, teaching class sessions, grading, meeting with students outside of class, etc.); advising; research, creative, or scholarly activities; and service activities (committee work, administrative duties, etc.)

Student-Faculty Interaction

Faculty reported how often they have done each of the following with the undergraduate students they teach or advise:

Supportive Environment

Faculty reported how important it was to them that your institution *increase* its emphasis on each of the following:

Faculty Values (Sorted highest to lowest)	Percentage of Faculty Responding "Very Important" or "Important"
Students spending significant amounts of time studying and on academic work	91%
Providing support to help students succeed academically	91%
Students using learning support services (tutoring services, writing center, etc.)	82%
Encouraging contact among students from different backgrounds (social, racial/ethnic, religious, etc.)	80%
Providing support for students' overall well-being (recreation, health care, counseling, etc.)	77%
Students attending events that address important social, economic, or political issues	65%
Helping students manage their non-academic responsibilities (work, family, etc.)	54%
Providing opportunities for students to be involved socially	52%
Students attending campus activities and events (performing arts, athletic events, etc.)	49%

Additional Questions

Your institution administered the following additional question set(s):

Academic Advising

Refer to your *FSSE 2013 Topical Module* report(s) for results.

What is FSSE?

FSSE, a complementary survey to the National Survey of Student Engagement, collects information annually at hundreds of four-year colleges and universities from faculty who teach at least one undergraduate course in the current academic year. The results provide information about faculty expectations for student engagement in educational practices that are empirically linked with student learning in development. Institutions use their data to identify aspects of the undergraduate experience that can be improved through changes in policy and practice. For more information, visit our website: fsse.indiana.edu
