ABOUT THE PROGRAM

This program is a nationally recognized program in quality coaching education. The program’s high quality curriculum has been accredited at the highest level by the National Committee for Accreditation of Coaching Education (NCACE) and is based on the National Standards for Sport Coaches that represent a core body of knowledge, skills and competencies that coaches should possess to prepare them to excel at all levels of competition.

WMU’s coaching sport performance master’s program is one of only 12 universities in the nation accredited at the highest level (level five) by the NCACE.

The program is entirely online, and as a WMU online student you are part of a community of professionals and learners from across the country.

The education, support and learning environment I received while attending WMU was the catalyst that propelled my program to the next level.
