Reasons to choose our program...

Western Michigan University’s audiology graduate program consistently generates advancements in knowledge and treatment regarding human hearing and communication processes and disorders. Program options include:

The **Doctor of Audiology** (Au.D.) is a four-year post-baccalaureate professional degree. The goal is to enable graduates to work effectively in an ever-changing world. As part of the degree program, students must successfully complete an independent scholarly project, outcomes-based formative assessment, and all requirements for the American Speech-Language-Hearing Association’s Certificate of Clinical Competence and/or state licensure.

Also available is a **4 + 3 Accelerated Doctor of Audiology** (Au.D.), a special program for WMU students who begin college with an interest in audiology to take coursework in that and related areas early and to begin entry level graduate coursework in their senior year, thus saving approximately six months of graduate study. Undergraduate students with senior standing can take up to 12 credit hours for graduate credit which can be counted toward both the bachelor degree and graduate degree. Students are charged at the undergraduate tuition rate.

Our comprehensive audiology curriculum exposes students to the breadth and depth of the profession, allowing them to develop knowledge and essential skills in clinical service provision, research and interprofessionalism.

Points of Pride

- The program is accredited by the Council on Academic Accreditation in Audiology and Speech-Language Pathology of the American Speech Language Hearing Association.
- The degree provides experience in on-campus specialty clinics, including: the Southwest Michigan Childhood Trauma Assessment Center and the WMU Charles Van Riper Language, Speech and Hearing Clinic.
- We offer dynamic and varied clinical partnerships for students within the southwest Michigan communities and beyond.
- Students work with recognized faculty scholars on research grants and projects related to assessment, listening and spoken language, hearing loss prevention, balance and fall risk assessment and effects of ototoxic agents on auditory development and physiology.
- The Van Riper Lecture Series, offered annually, allows national experts from a variety of specialty research and clinical areas to offer presentations that enhance the reputation of the department, college and University.
Audiology

Teaching, Research and Program Focus Areas
Faculty members receive prestigious federal grants from the National Institutes of Health, the Institute of Educational Sciences and the National Institute of Occupational Safety and Health. Faculty excellence is also reflected in numerous national awards and notable WMU awards for distinguished research and service.

Areas of expertise include:
- Hearing loss prevention
- Evaluation and treatment of hearing loss
- Balance and fall risk assessment
- Modeling neurodevelopmental disorders to understand mechanisms of damage
- Intervention effectiveness
- Patients’ perceptions of clinical outcomes

Industry Highlights
The department boasts an 88 percent three-year average program completion rate, a 100 percent three-year Praxis exam pass rate, and a 100 percent three-year employment rate for graduates in the profession.

The median salary for an audiologist is $67,137. The profession is ranked in the top-25 best careers, with projected growth over the next seven to 10 years.

Funding
Graduate assistantship/associateship positions, scholarships and financial aid may be available. Contact the department for more information.

Admission
Applicants are admitted for the fall semester only.

Applicants must first complete the application through the Communication Sciences and Disorders Centralized Application Service (https://portal.csdcas.org) and then the graduate student application (http://www.wmich.edu/apply/graduate).

Fall 2018 Deadline: Jan. 15, 2018
