Ability to learn

Knows when to seek help

Ability to

An ability to apply knowledge, techniques, skills and modern tools of mathematics, science, engineering, or technology to solve broadly-defined engineering problems.

An ability to design systems, components, or processes for broadly-defined engineering technology problems appropriate to program educational objectives.

An ability to apply written, oral, and graphical communication in both technical and non-technical environments; and an ability to identify and use appropriate technical literature.

An ability to conduct standard tests and measurements; to conduct, analyze, and interpret experiments; and to apply experimental results to improve processes.

An ability to function effectively as a member or leader on a technical team.

Student's primary strengths:

Areas for improvement:
