Re: Asylum Lake Preserve Seedling Spraying 2015

This December we wrapped up our woody plant control budgeted for fall 2014 through spring of 2015. Outlined below is a cost to do seedling spraying in all the areas we have controlled invasive species to date.

On the attached map we have outlined in green all of the areas that have had some invasive species control in total from the beginning of our involvement. These areas total approximately 51 acres. Approximately 19 acres had cut stump or drill and fill treatments this year and have not had any previous seedling spraying.

At a minimum we would like to treat any seedlings or re-sprouts throughout the entire areas outlined in green in the spring or early summer of 2015. The cost for this seedling spraying would be \$8,900. This price includes transportation time and the cost of all materials. This is a fixed price but if you prefer we would be happy to work time and materials as well. If budget allows we would like to continue to expand the areas we have cut stumped larger woody invasive species. If you have any questions please let us know.

Sincerely,

Bill Schneider
